

### DYNamic desk

DYN desk is a dynamic solution that satisfies all the needs of a contemporary working man...high aesthetic values of solid wood and modern materials, purified minimalistic design, durability and, more importantly, innovative ergonomic multifunctional solutions implemented into design and technology of a single product.

### DYN - hidden solutions for all your needs

Adaptability of DYN desk is its main advantage. IT equipment is hidden and fully integrated into desk itself and its cabinets, but also very approachable simply by pushing a button, which lifts the monitor from the work top or work top itself and reveals IT and media equipment hidden in the cabinets simply by sliding a door.

### Easy transformation

Ergonomic experts recommend frequent changes from sitting to standing position where standing phase should not be longer than 20 minutes.

Static sitting and standing should be equally avoided. In a couple of seconds DYN is easily transformed from sitting to standing work surface by an electric lift system.
